

DAVID OGBONNAH

Senior DevOps Engineer
Senior Platform Engineer
Cloud Solution Architect
London, United Kingdom

PROFILE

Senior DevOps Engineer and Platform Engineer with 9+ years of experience helping engineering teams build reliable platforms, improve delivery speed, strengthen operational foundations, and reduce friction across complex technology environments.

I work across cloud platform delivery, infrastructure automation, software delivery pipelines, observability foundations, engineering standards, and delivery enablement.

STRENGTHS

- Platform engineering strategy and implementation
- Cloud foundation design and delivery
- Infrastructure as code and reusable delivery patterns
- Deployment automation and release enablement
- Observability and operational readiness
- Engineering standards, documentation, and team enablement

REPRESENTATIVE WORK

- Led platform engineering and DevOps improvement initiatives for regulated delivery environments.
- Built reusable delivery foundations that helped teams standardise infrastructure, application deployment, and operational practices.
- Supported multi-environment cloud platform delivery for data, application, and internal tooling workloads.
- Helped teams move from fragmented delivery processes toward clearer platform standards and more reliable release paths.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate, August 2026
- AWS Certified AI Practitioner, 2025
- AWS Certified Cloud Practitioner, 2025
- Google Associate Cloud Engineer, 2024

EDUCATION

BSc (Hons) Computer Science, University of Hertfordshire, 2015
